

# SCAG<sup>®</sup>

## POWER EQUIPMENT

### MODEL SWZ

THIS MANUAL CONTAINS THE OPERATING INSTRUCTIONS AND SAFETY INFORMATION FOR YOUR SCAG MOWER. READING THIS MANUAL CAN PROVIDE YOU WITH ASSISTANCE IN MAINTENANCE AND ADJUSTMENT PROCEDURES TO KEEP YOUR MOWER PERFORMING TO MAXIMUM EFFICIENCY. THE SPECIFIC MODELS THAT THIS BOOK COVERS ARE CONTAINED ON THE INSIDE COVER. BEFORE OPERATING YOUR MACHINE, PLEASE READ ALL THE INFORMATION ENCLOSED.

OPERATOR'S MANUAL

# **WARNING:**

## **FAILURE TO FOLLOW SAFE OPERATING PRACTICES MAY RESULT IN SERIOUS INJURY.**

- \* Keep all shields in place, especially the grass discharge chute.
- \* Before performing any maintenance or service, stop the machine and remove the spark plug wire and ignition key.
- \* If a mechanism becomes clogged, stop the engine before cleaning.
- \* Keep hands, feet and clothing away from power-driven parts.
- \* Read this manual completely as well as other manuals that came with your mower.
- \* Keep others off the tractor (only one person at a time)

## **REMEMBER - YOUR MOWER IS ONLY AS SAFE AS THE OPERATOR!**

Hazard control and accident prevention are dependent upon the awareness, concern, prudence, and proper training of the personnel involved in the operation, transport, maintenance, and storage of the equipment.

This manual covers the operating instructions  
and illustrated parts list for:

<b>SWZ36-14KA</b>	<b>with a serial number of 5120001 to 5129999</b>
<b>SWZ36-15KH</b>	<b>with a serial number of 5130001 to 5139999</b>
<b>SWZ48-14KA</b>	<b>with a serial number of 5140001 to 5149999</b>
<b>SWZ48-15KH</b>	<b>with a serial number of 5150001 to 5159999</b>
<b>SWZ48-17KA</b>	<b>with a serial number of 5160001 to 5169999</b>
<b>SWZ48A-17KA</b>	<b>with a serial number of 5170001 to 5179999</b>
<b>SWZ52-17KA</b>	<b>with a serial number of 5180001 to 5189999</b>
<b>SWZ52A-17KA</b>	<b>with a serial number of 5190001 to 5199999</b>
<b>SWZ52-17KAE</b>	<b>with a serial number of 5970001 to 5979999</b>
<b>SWZ-21KAE</b>	<b>with a serial number of 5210001 to 5219999</b>
<b>SWM-61/E</b>	<b>with a serial number of 5230001 to 5239999</b>
<b>SWM-72/E</b>	<b>with a serial number of 5240001 to 5249999</b>
<b>SWM-52A</b>	<b>with a serial number of 5250001 to 5259999</b>

Always use the entire serial number listed on the serial number tag when referring to this product.

## INTRODUCTION

Your mower was built to the highest standards in the industry. However, the prolonged life and maximum efficiency of your mower depends on you following the operating, maintenance and adjustment instructions in this manual.

We encourage you to contact your dealer for repairs. All Scag dealers are informed of the latest methods to service this equipment and provide prompt and efficient service in the field or at their service shop. They carry a full line of Scag service parts.

A replacement Operator's Manual is available from your Scag Servicing Dealer or by contacting Scag Power Equipment, Service Department, at P.O. Box 152, Mayville, WI 53050. Please indicate the complete model and serial number of your Scag product.

### **USE OF OTHER THAN ORIGINAL SCAG REPLACEMENT PARTS WILL VOID THE WARRANTY.**

The "Right" and "Left", "Front" and "Rear" of the machine are referenced from the operator's perspective when in the normal operating position and facing the forward travel direction.

## GENERAL SAFETY INSTRUCTIONS

**READ THIS OPERATOR'S MANUAL** and instructions furnished with attachments.

Perform only those maintenance procedures described in this manual. If major repairs are ever needed or assistance is desired, contact an Authorized Scag Dealer. To ensure optimum performance and safety, always purchase genuine SCAG replacement parts and accessories.

Your safety and the safety of others depends significantly upon your knowledge and understanding of all correct operating practices and procedures of this machine.

## SIGNAL WORDS

This symbol means **"Attention! Become Alert! Your Safety is Involved!"** The symbol is used with the following signal words to attract your attention to safety messages found on the decals and throughout this manual. The message that follows the symbol contains important information about safety. To avoid injury and possible death, carefully read the message! Be sure to fully understand the causes of possible injury or death.

### **Signal Word:**

It is a distinctive word on safety decals and throughout this manual that alerts the viewer to the existence and relative degree of the hazard.

The signal word "DANGER" denotes that an extremely hazardous situation exists on or near the machine that could result in high probability of death or irreparable injury if proper precautions are not taken.

The signal word "WARNING" denotes that a hazard exists on or near the machine that can result in injury or death if proper precautions are not taken.

The signal word "CAUTION" is a reminder of safety practices on or near the machine that could result in personal injury if proper precautions are not taken.

## BEFORE OPERATING

1. Know the controls and how to stop quickly.
2. Do not allow children to operate the machine.  
Do not allow adults to operate the machine without proper instruction.
3. Remove all debris or other objects that might be picked up and thrown by the cutter blades. Keep all bystanders away from the mowing area.
4. Keep all shields, safety devices, and decals in place. If a shield, safety device or decal is defective or damaged, repair or replace it before operating. Also, check all nuts, bolts and screws for proper tightness, to assure the machine is in safe operating condition.
5. Do not operate the machine while wearing sandals, tennis shoes, sneakers or shorts. Also, do not wear loose fitting clothing which could get caught in moving parts. Always wear long pants and substantial shoes. Wearing safety glasses and safety shoes is advisable and required by some local ordinances and insurance regulations.
6. Fill the fuel tank with clean, fresh gasoline, with a minimum octane rating of 87. Avoid spilling gasoline. Gasoline is highly flammable, handle it carefully.
  - A. Use an approved gasoline container.
  - B. Do not fill the tank while the engine is hot or running.
  - C. Do not smoke while handling gasoline.
  - D. Fill the fuel tank outdoors and up to approximately 1" (25 mm) below the bottom of the filler neck.
  - E. Wipe up any spilled gasoline.
7. Before attempting to start the engine, move the speed adjustment lever into the neutral position, move the blade engagement switch to the OFF position, apply the parking brake, and move the neutral latches to neutral.

## WHILE OPERATING

1. Start the engine when the neutral latches are in the neutral lock position, the cutter blades are disengaged, the parking brake is on and the speed adjustment lever is in the neutral position.
2. Do not run the engine in a confined area without adequate ventilation. Exhaust fumes are hazardous and could possibly be deadly.
3. Using the machine demands attention. To prevent loss of control:
  - A. Mow only in daylight or when there is good artificial light.
  - B. Watch for holes or other hidden hazards.
  - C. Do not drive close to a drop-off, ditch, creek bank, or other hazard.
  - D. Reduce speed when making sharp turns and when turning on hillsides.
  - E. Always be sure of your footing. Keep a firm hold on the handles and walk---never run.
  - F. Do not operate where conditions are slippery.
4. The discharge chute must always be installed and in the down position on the side discharge cutter deck except when the Scag optional grass catcher or mulching plate are properly installed. If the discharge area should plug, shut the engine off and wait for all movement to stop before removing the obstruction.
5. Disengage the blades and wait for them to stop before crossing gravel drives, walks or roads.
6. Shut the engine off and wait until the blades come to a complete stop before removing the grass catcher container.
7. Never raise the cutter deck while the blades are rotating.
8. Always park the mower and/or start the engine on a level surface. Apply the parking brake to prevent the mower from moving when you are not in the operator's position.

9. If the cutting blades should strike a solid object or the equipment should start to vibrate abnormally, stop the engine, disconnect the spark plug wire, and check immediately for the cause. Vibration is generally a warning of trouble. Check the machine for damaged or defective parts. Repair any damage before starting the engine or operating the cutter deck. Be sure the blades are in good condition and the blade bolts are tight.

10. Reduce speed and exercise extreme caution on slopes and in sharp turns to prevent tipping or loss of control. Be especially cautious when changing directions on slopes.

## **WARNING:**

**DO NOT operate on steep slopes. To check a slope, attempt to back up it (with the cutter deck down). If the machine can back up the slope without the wheels slipping, reduce speed and use extreme caution. ALWAYS FOLLOW OSHA APPROVED OPERATION.**

11. Do not touch the engine or muffler while the engine is running or soon after it is stopped. These areas could be hot enough to cause a burn.
12. Before leaving the operator's position or leaving the mower unattended, move the speed adjustment lever into the neutral position, place the neutral latches in the neutral lock position, apply the parking brake, and move the blade engagement switch to OFF. Shut the engine OFF and remove the key.
13. Do not pass or stand on the grass discharge side of any mower with the engine running. Stop operation when another person approaches.

14. Use only Scag approved riding attachments.

Scag Approved Riding Attachments:

RS-ZT

Using unapproved attachments, (especially "stand-up" riding attachments) may be hazardous.

## **MAINTENANCE AND STORAGE**

1. Disconnect the spark plug wire from the spark plug to prevent accidental starting of the engine when servicing, adjusting or storing the machine.
2. If the mower must be tipped to perform maintenance or adjustment, remove the battery, drain the gasoline from the fuel tank and the oil from the crankcase.
3. To reduce potential fire hazard, keep the engine free of excessive grease, grass, leaves and accumulations of dirt.
4. Be sure the machine is in safe operating condition by keeping nuts, bolts, and screws tight. Check the blade mounting bolts and nuts frequently to be sure they are tightened.
5. If the engine must be running to perform a maintenance adjustment, keep hands, feet, clothing and other parts of the body away from the cutter deck blades and other moving parts.
6. Do not overspeed the engine by changing governor settings. To be sure of safety and accuracy, have an authorized dealer check maximum engine speed with a tachometer.
7. The engine must be shut off before checking the oil or adding oil to the crankcase.
8. Allow the engine to cool before storing the mower in any enclosure such as a garage or storage shed. Make sure the fuel tank is empty if the machine is to be stored in excess of 30 days. Do not store the mower near any open flame or where gasoline fumes may be ignited by a spark.

9. Always store gasoline in a safety-approved, red container.
10. Be careful when servicing the battery as it contains acid, which is corrosive and could cause burns to skin and clothing.
11. Batteries release explosive gases when being charged or discharged. Keep batteries away from any source of sparks and/or flame.
12. Make sure all hydraulic connections are tight and all hydraulic hoses and lines are in good condition before starting the machine.
13. Hydraulic fluid is under high pressure. If you need service on your hydraulic system, please see your authorized Scag dealer.

## INITIAL RUN-IN PROCEDURES (FIRST DAY OF USE OR APPROXIMATELY 10 HOURS)

1. Check the belts for proper tension at 2, 4 and 8 hours. Adjust as needed.
2. Check the steering control rods and the speed control for neutral adjustment. (See Adjustments, page 6-8)
3. Check the tires for proper pressure.
 

Caster Wheels	25 psi.
Drive Wheels	15 psi.
4. Check for loose hardware. Tighten as needed.
5. Check the safety switches for proper adjustment:
  - \* The engine should crank and start if the machine is in neutral, the PTO engagement switch is OFF and the parking brake is ON.
6. Apply lubricant to all the grease fittings. Lubricant was applied at the factory. This is just a precautionary check to make sure that all the fittings have been lubricated.

## MOWER OPERATION

1. Read and understand the safety instructions before attempting to operate this machine.
2. Before starting the engine:

- \* Check the oil level in the engine and the hydraulic reservoir.
- \* Fill the fuel tank with clean, fresh, lead-free gasoline.
- \* Open the fuel valve on the bottom of the fuel tank.

### -NOTE-

*Use gasoline with an octane rating no less than 87.*

- \* The speed adjustment lever must be in NEUTRAL.
- \* The blade clutch switch must be in the OFF position.
- \* The neutral latches must be in the neutral lock position.
- \* The key switch must be on.
- \* The parking brake must be on.

3. Start the engine:

- \* Choke as required. If the engine is cold, pull the choke knob out. When the engine starts, slowly push the choke in. If the engine stalls, repeat the above operation. When the engine is warm, choking may not be necessary.

4. Engage the cutter blades by pulling the blade clutch switch into the ON position. Push the switch to the OFF position to disengage the cutter blades.

390S0138

## -NOTE-

When PTO is engaged or (possibly) disengaged, a squealing sound from the underside of the machine is normal. It is caused by the electric clutch plates meshing as the mower comes up to speed. For best equipment life, engage the clutch with the engine at 1/2 throttle, not under full load.

## ⚠ WARNING:

If you are not familiar with the operation of the hydrostatic drive and zero turn feature, practice turning and maneuvering with the hand controls before engaging the blades.

- Release the parking brake. Move the speed adjustment lever to the desired mowing speed.

## -NOTE-

Top speed is suggested only for transport!

- While squeezing the steering brake levers with both hands, release both neutral latches.
- When the steering brake levers are released, the machine will travel straight. To make a right turn, squeeze the RH lever. To turn left, squeeze the LH lever.
- TO STOP, squeeze both levers, lock the neutral latches, and move the speed adjustment lever to neutral.
- To move the machine in reverse, squeeze up on both steering control levers.
- To "freewheel" or move the machine around without the engine running, turn the dump valve levers located at the back of the pumps to the "freewheel" positions (see Figure 1). To operate the machine, the dump valve levers must be returned to the closed positions.

Dump Valve Levers  
(normal position)

Figure 1. Dump Valves

SGB112

## CUTTER DECK BELT ADJUSTMENTS

## -NOTE-

The hydro drive belt is spring loaded and does not require adjustment.

- Remove the belt cover.
- Adjust the cutter deck drive belt using a belt tension gauge. Adjust the belt so that the belt moves 1/2" with 10 pounds of pressure. Adjust the tension by tightening or loosening the J-bolt nut. (See figure 2)

Figure 2. Deck Drive Belt Adjustment

SC400G

## -NOTE-

Due to initial belt stretch and to prevent the belt from slipping, check this adjustment after the first 2 hours, 4 hours and 8 hours of operation.

3. Adjust the RH blade drive belt using a belt tension gauge. Adjust the belt so that the belt moves 1/2" with 10 pounds of pressure. Adjust the tension by tightening or loosening the J-bolt nut (See figure 3).
4. Replace the belt cover.

**Figure 3. Cutter Deck Belt Adjustment R.H.**

## CUTTER DECK ADJUSTMENTS

Due to the many cutting conditions that exist, it is difficult to suggest a cutter deck setting that will work for every lawn. There are two adjustments that can be made on these decks, pitch and height.

**PITCH** is the angle of the blades (comparing front to rear). A 1/4" downward pitch (front of deck down) is recommended for best cutting performance.

**HEIGHT** is the nominal distance the blade is off of the ground. This measurement is made with the blades pointed side to side and distance is measured between cutting tip and ground. (Also see Blade Height Adjustment)

Changes to the cutting height can be achieved by repositioning the cutter deck. (This adjustment will also effect the pitch of the deck). There are three available positions (see figure 4).

**CUTTER DECK HEIGHT ADJUSTMENT**

SC405G

**Figure 4. Cutting Height Adjustment**

Caster spacers also can be repositioned to change cutting heights and to change the pitch of the deck. (See figure 5)

**REPOSITIONING SPACERS**

SC406G99

**Figure 5. Caster Wheel Spacers**

## BLADE HEIGHT ADJUSTMENT

Adjusting the blade height can be done by moving any number of the five smaller 1/4" spacers on the blade mounting bolts to the top of the spindle shaft or below the spindle shaft.

## -NOTE-

*All blades should be positioned equally.*

For best cut and discharge, a minimum of three spacers should be installed between the blade and the spindle (See figure 6).

SC407G

**Figure 6. Blade Spacers**

## CUTTER BLADES

Do not sharpen beyond 1/3 of the width of the blade. (See figure 7)

### -NOTE-

*Dress the blade with a file. Using a wheel grinder may burn the blade. Check the balance of the blade. If blades are out of balance, vibration and premature wear of spindle assembly can occur. See your authorized Scag dealer for blade balancing or special tools, if you choose to balance your own blades.*

**Figure 7. Blade Sharpening**

## NEUTRAL ADJUSTMENT

### -NOTE-

*Neutral has been set by your Scag dealer at the time of setup and normally does not need to be adjusted. If, however, you find that the neutral has come out of adjustment follow the procedure below.*

1. Raise the drive wheels off the ground and block the caster wheels.
2. Make sure the speed control lever is in neutral, the steering control levers are in the neutral latch position, and the parking brake is on. Start the engine.
3. Release the parking brake and note if the tires are rotating.
4. Starting on the left side of the machine, rotate the tracking adjustment knob counter clockwise just until the LH wheel starts to creep forward. Make a note of the position of the adjusting knob (see Figure 8).
5. Turn the adjusting knob clockwise just until the wheel turns rearward. Make a note of the position of the adjusting knob. To adjust neutral, split the difference between the two noted positions of the adjusting knob.
6. Turn the engine off.

**Figure 8. Neutral Adjustment**

## STEERING CONTROL ROD ADJUSTMENT

### -NOTE-

*This adjustment is made to allow the steering control levers to be moved out of the neutral latch without engaging reverse.*

*Before making this adjustment be sure that the speed control bearing is just touching the speed control cam and that the bellcrank bearing is resting in the center groove of the neutral cam.*

1. Remove the speed control spring. Remove the steering control rod swivel hair pin. Check the location of the swivel in the slotted hole in the bell crank .
2. Turn the swivel joint on the steering control rods until the swivel joint is centered in the slot in the bellcrank.

**Figure 5. Control Rod Adjustment**

3. Reinstall the speed control spring onto the swivel. Install the hair pin onto the swivel.

## TRACKING ADJUSTMENT

### -NOTE-

*Before proceeding with this adjustment, be sure that the tire pressures are correct. (see page 4) and that the neutral adjustment and the steering control rod adjustment have been completed.*

1. With the machine on a flat level surface, start the engine and place the speed adjustment lever into the speed that will most often be used.

2. Squeeze the steering control levers and release the neutral latch. Slowly release the steering control levers, allowing the machine to move forward.
3. If the machine pulls to one side, turn the tracking adjustment knob on the slower side counter clock-wise until the machine tracks straight (see Figure 6).
4. Bring the steering control levers back to the neutral lock position and check to see that the machine does not creep forward on the adjusted wheel.
5. If the machine creeps in neutral you have moved out of the neutral band and will have to turn the tracking adjustment knob clockwise until the machine does not creep.
6. Repeat steps 1 and 2. If the machine pulls to one side, turn the tracking adjustment knob on the faster side clockwise until the machine tracks straight.
8. If tracking cannot be achieved, contact your Scag servicing dealer.

**Figure 6. Tracking Adjustment**

## PARKING BRAKE

1. Adjust the parking brake so that when the brake hand lever is against the stop on the handle bar, the brake levers on the brake shaft weldment are against the stops on the engine deck.

### CAUTION:

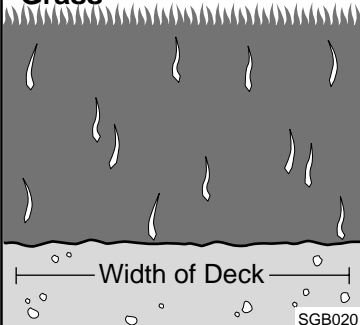

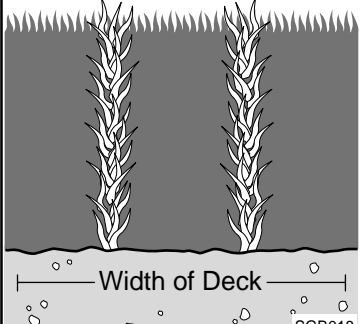

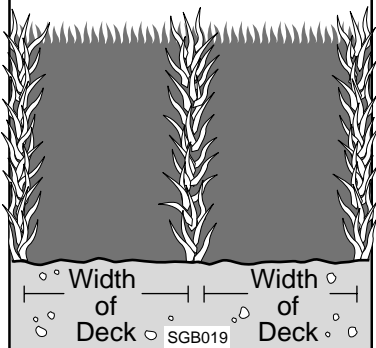

**Adjust the brake only enough to hold the machine. Excessive force may cause damage to the machine or brake components.**

2. Adjust the brake actuator rod on either side of the machine to obtain proper brake adjustment.

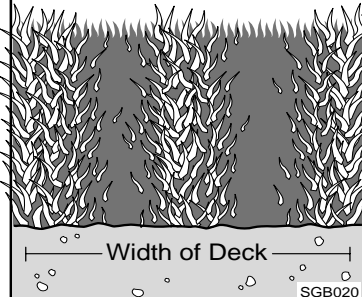

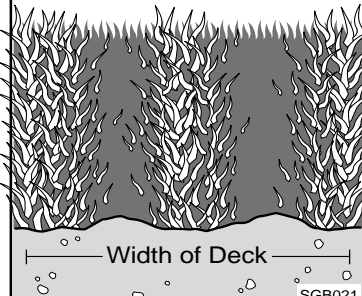

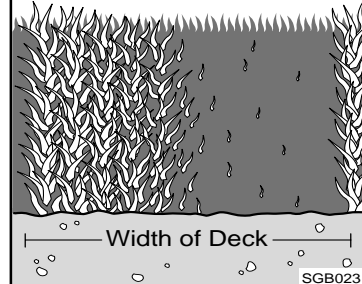

## LUBRICATION & MAINTENANCE

BREAK-IN			
X X	8 HOURS (DAILY)	+ Grease spindle until grease comes out the relief valve Compatible Greases:      Lidok EP #2 (found at industrial shops) Ronex MP (Exxon service stations) Shell Alvania (Shell service stations) Mobilux #2 (Mobil service stations) Super Lub M EP #2 (Conoco service stations)	
	40 HOURS (WEEKLY)		
	100 HOURS (BIWEEKLY)		
	500 HRS OR ANNUALLY		
		PROCEDURE	COMMENTS
X		Check all hardware for proper tightness	
X		Change engine oil and filter at 5 hours	
X	X	Check engine oil	Do not over fill
X	X	Remove debris from under belt cover	More often if needed
X	X	Sharpen cutter blades	More often if needed
X	X	Grease spindle bearings	+ US Lithium MP White Grease 2125
X	X	Clean air filter	More often if needed
X	X	Check belt tension	Adjust as needed
X	X	Check tire pressure	Add or adjust as required
	X	Check battery level	Adjust as needed
	X	Replace air filter	More often if needed
	X	Grease caster wheel bearings	Chassis grease
	X	Grease caster wheel pivot shafts	Chassis grease
	X	Grease idler pulley bracket on cutter deck	Chassis grease
	X	Change hydrostatic oil filter	Clean area before removing the filter
	X	Change engine oil and filter	See engine manufacturer information
	X	Grease idler arm pivots	Chassis grease
	X	Grease brake hand lever	Chassis grease
	X	Grease brake actuator levers	Chassis grease
	X	Check all hardware for proper tightness	
	X	Adjust air gap on electric clutch	Contact your Scag dealer for information about making this adjustment.
	X	Drain hydraulic system and replace oil	

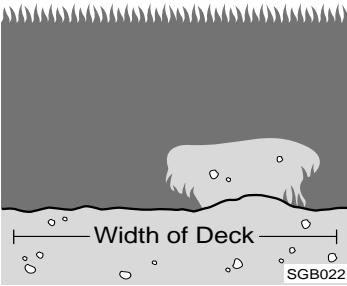

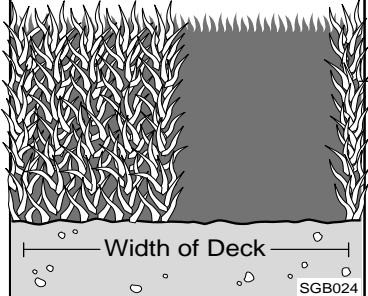

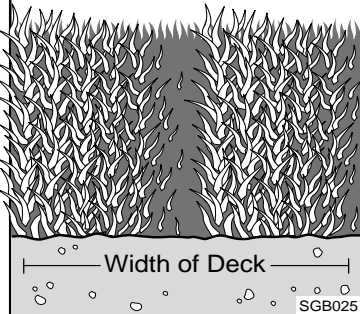

## TROUBLESHOOTING CUTTING CONDITIONS

CONDITION	CAUSE	CURE
<b>Stringers - Occasional Blades of Uncut Grass</b> 	Low engine RPM	Run engine at full 3600 RPM
	Ground speed too fast	Slow speed to adjust for conditions
	Wet grass	Cut grass after it has dried out
	Dull blades, incorrect sharpening	Sharpen blades
	Deck plugged, grass accumulation	Clean underside of deck
	Belts slipping	Adjust belt tensions
<b>Streaking - Strips of Uncut Grass in Cutting Path</b> 	Dull, worn blades	Sharpen blades
	Incorrect blade sharpening	Sharpen blades
	Low engine RPM	Run engine at full 3600 RPM
	Belt slipping	Adjust belt tension
	Deck plugged, grass accumulation	Clean underside of deck
	Ground speed too fast	Slow speed to adjust for conditions
	Wet grass	Cut grass after it has dried out
	Bent blades	Replace blades
<b>Streaking - Strips of Uncut Grass Between Cutting Paths</b> 	Not enough overlapping between rows	Increase the overlap of each pass

## TROUBLESHOOTING

CONDITION	CAUSE	CURE
<b>Uneven Cut on Flat Ground - Wavy High-Low Appearance, Scalloped Cut, or Rough Contour</b> 	Lift worn off of blade	Replace blade
	Blade upside down	Mount with cutting edge toward ground
	Deck plugged, grass accumulation	Clean underside of deck
	Too much blade angle (deck pitch)	Adjust pitch and level
	Deck mounted improperly	See your authorized SCAG dealer
	Bent spindle area	See your authorized SCAG dealer
	Dull blade	Sharpen blade
<b>Uneven Cut on Uneven Ground - Wavy Appearance, High-Low Scalloped Cut, or Rough Contour</b> 	Uneven ground	May need to reduce ground speed, raise cutting height, and/or change direction of cut
<b>Sloping Ridge Across Width of Cutting Path</b> 	Tire pressures not equal	Check and adjust tire pressure
	Wheels uneven	Check and adjust tire pressure
	Deck mounted incorrectly	See your authorized SCAG dealer

## TROUBLESHOOTING

CONDITION	CAUSE	CURE
<b>Scalping - Blades Hitting Dirt or Cutting Very Close to the Ground</b>  	Low tire pressures	Check and adjust pressures
	Ground speed too fast	Slow speed to adjust for conditions
	Cutting too low	May need to reduce ground speed, raise cutting height, change direction of cut, and/or change pitch and level
	Rough terrain	May need to reduce ground speed, raise cutting height, and/or change direction of cut
	Ground speed too fast	Slow speed to adjust for conditions
<b>Step Cut Ridge in Center of Cutting Path</b>  	Wet grass	Cut grass after it has dried out
	Blades not mounted evenly	Adjust pitch and level
	Bent blade	Replace blade
	Internal spindle failure	See your authorized SCAG dealer
<b>Slope Cut - Sloping Ridges Across Width of Cutting Path</b>  	Mounting of spindle incorrect	See your authorized SCAG dealer
	Bent spindle mounting area	See your authorized SCAG dealer
	Internal spindle failure	See your authorized SCAG dealer
	Bent deck housing	See your authorized SCAG dealer

## TECHNICAL SPECIFICATIONS

### ENGINES

General Type:	Heavy duty industrial/commercial
Brand:	Kohler, Kawasaki,
Models:	Kohler CV15T, Kaw. FC420V (14HP), FH500V (17HP),
Horsepower:	Kohler 15HP; Kaw. 14HP; Kaw. 17HP
Type:	4 cycle gas, vertical shaft engines
Displacement:	Kohler: 15HP = 426cc Kawasaki: 14HP = 423cc, 17HP = 494cc
Cylinders:	Varied - see manufacturer's specifications
Governor:	Mechanical type governor with variable speed control set at 3600 rpm ( $\pm 75$ rpm), idle set at 1200 rpm ( $\pm 75$ rpm)
Exhaust Group:	Single exhaust canister muffler
Fuel Pump Group:	Varied - See manufacturer's specifications
Oil Pump Group:	Varied - See manufacturer's specifications
Valve Group:	Varied - See manufacturer's specifications
Starter/Electrical:	Electronic Ignition with recoil starter or 12 volt battery with alternator, solid state ignition with key start
Charging System:	15 amp

### ENGINE DECK

Thickness:	7 gauge steel
Fuel Tank:	5 gallon (19.0 litres) seamless polyethylene
Drive Wheels/Tires:	16x6.50-8 four-ply pneumatic tubeless, radius edge
Brakes:	Dynamic braking through hydro drive system
Axles:	1" tapered
Handle Bars:	1-1/4" diameter

### DRIVE SYSTEM

Type:	Hydro drive with two variable displacement pumps and two cast-iron high torque motors
Hydro Pumps:	Two Hydro-Gear Model BDP 10L pumps with dump valves for movement without running the engine
Drive Wheel Motors:	Two 12 cu. inch cast-iron high torque motors
Hydro Fluid Cooling Group:	4qt. capacity cooling radiator, uses, SAE 20W/50 fluid and 10 micron filter
Steering / Travel Control::	Independent handle controls for each wheel, squeeze to move from forward to neutral to reverse, neutral lock lever, speed range controlled with single lever (patented design), in-field tracking adjustment with no tools necessary
Parking Brakes:	7.5" drum, band brake, one on each wheel
Dump Valves:	Allows for movement without engine running
Axles:	1" tapered motor shafts
Wire Harness:	14 gauge wire
Safety Group:	Handle actuated operator presence system (patented design), blade / clutch and transmission interlock to engine kill
Forward Speed Range:	0 to 7.4 mph
Reverse Speed Range:	0 to 3.0 mph

## TECHNICAL SPECIFICATIONS (CON'T)

### CUTTER DECKS

Type:	SWM 36, SWM 48, SWM 48 Advantage, SWM 52, SWM 52 Advantage, SWM 61, SWM 72
Construction:	Out-front design with anti-scalp rollers
Cutting Width:	SWM36,48, 48A: 7-gauge steel with 7-gauge (3/16") steel skirt SWM52,52A, 61,72: 10-gauge steel with 7-gauge (3/16") steel skirt 35.5" (90.2 cm), 48.0 (122.0 cm), 52.0 " (132.0 cm), 61.0 " (155.0 cm), 71.5" (181.6 cm)
Cutting Height Adjustment:	Adjustable from 1-3/4" to 4-1/4" in 1/4" increments
Cutter Blades:	Marbane®, .197 thickness SWM 36: Two (2) 18"; SWM 48: Three (3) 16.5" SWM 52: Three (3) 18"; SWM 61: Three (3) 21" SM72: Three (3) 24" blades
Blade Engagement:	Electric blade brake clutch with instrument panel switch
Discharge Opening:	Extra wide 11.5", 13.75 " discharge opening with hinged chute
Caster Wheels:	9.4 x 3.5 smooth tread flotation, inner tubes, split rims, roller bearings, with quick pin removal
Spindles:	Cast housing, taper roller bearing, low maintenance with top access grease fitting and grease overfill relief poppet
Spindle Pulleys:	Cast-iron with easily removed taper hubs
Idler Pulley:	5" diameter pulley, welded and riveted construction, 1-3/8" O.D. Bearing
Idler Arm:	Heavy duty idler arm of 1/4" channel steel
Cutter Deck Belts:	B-section with Kevlar cord

### ADDITIONAL SPECIFICATIONS

### OPTIONAL ITEMS/ATTACHMENTS

Fabric Grass Catcher:	GC-F4 Grass Catcher with 4 cubic ft. capacity
Metal Grass Catcher:	GC-4D Grass Catcher with 4 cubic ft. capacity and rope pull dump or pick-up and dump
Steerable Sulky:	RS-ZT Steerable Sulky with padded seat and full articulation for zero-radius turning
Mulching Plate:	Steel plate fits over discharge opening. No blade change or or removal required. Installs and removes in the field.

# LIMITED WARRANTY - COMMERCIAL EQUIPMENT

---

Any part of the Scag commercial mower manufactured by Scag Power Equipment and found, in the reasonable judgment of Scag, to be defective in materials or workmanship, will be repaired or replaced by an Authorized Scag Service Dealer without charge for parts and labor. This warranty is limited to the original purchaser and is not transferable. Proof of purchase will be required by the dealer to substantiate any warranty claims. All warranty work must be performed by an Authorized Scag Service Dealer.

This warranty is limited to the following specified periods from the date of the original retail purchase for defects in materials or workmanship:

- \* Wear items including drive belts, blades, hydraulic hoses and tires are warranted for ninety (90) days.
- \* Batteries are covered for ninety (90) days.
- \* Frame and structural components including oil reservoir, fittings, and oil coolers are warranted for 1 year.
- \* Cutter decks are warranted against cracking for a period of three (3) years. (Parts and labor 1st year; Parts only 2nd and 3rd year) The repair or replacement of the cutter deck will be at the option of Scag Power Equipment. We reserve the right to request components for evaluation. This warranty does not cover any mower that has been subject to misuse, neglect, negligence, or accident, or that has been operated in any way contrary to the operating instructions as specified in the Operator's Manual.
- \* Engines and electric starters are covered by the engine manufacturer's warranty period.
- \* Major drive system components (hydraulic pumps and hydraulic motors only) are warranted for two (2) years by Scag Power Equipment. (Parts and labor 1st year; Parts only 2nd year) (Two year warranty excludes fittings, hoses, cooling system, oil reservoir, drive belts, transaxles). The repair or replacement of the hydraulic pump or hydraulic motor will be at the option of Scag Power Equipment. This warranty does not cover any mower that has been subject to misuse, neglect, negligence, or accident, or that has been operated in any way contrary to the operating instructions as specified in the Operator's Manual.
- \* Electric clutches have a Limited Warranty for 2 year (Parts and labor 1st year; Parts only 2nd year).
- \* Cutter Spindle Assemblies 46631 have a Limited Warranty for three years (Parts and labor 1st year; Parts only 2nd and 3rd year).
- \* Any Scag product used for rental purposes is covered by a 90 day warranty.

The Scag mower, including any defective part must be returned to an Authorized Scag Service Dealer within the warranty period. The expense of delivering the mower to the dealer for warranty work and the expense of returning it to the owner after repair will be paid for by the owner. Scag's responsibility is limited to making the required repairs and no claim of breach of warranty shall be cause for cancellation or rescission of the contract of sale of any Scag mower.

**This warranty does not cover any mower that has been subject to misuse, neglect, negligence, or accident, or that has been operated in any way contrary to the operating instructions as specified in the Operator's Manual.** The warranty does not apply to any damage to the mower that is the result of improper maintenance, or to any mower or parts that have not been assembled or installed as specified in the Operator's Manual and Assembly Manual. The warranty does not cover any mower that has been altered or modified, changing performance or durability. In addition, the warranty does not extend to repairs made necessary by normal wear, or by the use of parts or accessories which, in the reasonable judgment of Scag, are either incompatible with the Scag mower or adversely affect its operation, performance or durability.

**Scag Power Equipment reserves the right to change or improve the design of any mower without assuming any obligation to modify any mower previously manufactured.** All other implied warranties are limited in duration to the one (1) year warranty period or ninety (90) days for mowers used for rental purpose. Accordingly, any such implied warranties including merchantability, fitness for a particular purpose, or otherwise, are disclaimed in their entirety after the expiration of the appropriate one year or ninety day warranty period. Scag's obligation under this warranty is strictly and exclusively limited to the repair or replacement of defective parts and Scag does not assume or authorize anyone to assume for them any other obligation. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

Scag assumes no responsibility for incidental, consequential or other damages including, but not limited to, expense for gasoline, expense of delivering the mower to an Authorized Scag Service Dealer and expense of returning it to the owner, mechanic's travel time, telephone or telegram charges, rental of a like product during the time warranty repairs are being performed, travel, loss or damage to personal property, loss of revenue, loss of use of the mower, loss of time or inconvenience. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
